International Conference

MATRIB

2003

MATERIALS
TRIBOLOGY
PROCESSING

June 26-28, 2003

Organised by

Croatian Society for Materials and Tribology
Dublin Institute of Technology

Co-Organisers

University of Zagreb
University of Bologna
Studio D'Ingegneria Rogante

Materials science is one of the fastest growing fields in technology. Almost every day, advanced materials with new or improved properties emerge, giving impetus to technological progress. The wide range and uses of new materials has prompted the international conference on Materials and Tribology

MATRIB 2003

The aim of the conference is to provide an opportunity for technologists to present recent progress in research, development and applications of advanced materials, tribology and related disciplines. The conference draws together high calibre academics and experts industrialists to work towards developing practical solutions for materials and tribological problems and initiating new innovations in this area. MATRIB '03 promises to provide a wealth of knowledge for those working in the field of materials and Tribology.

The themes of the conference include:

- ♦ materials and processing
- ♦ testing and characterisation of materials
- ♦ friction and wear
- ♦ surface engineering
- ♦ nanomaterials and nanotechnology
- ♦ materials protection and conservation
- ♦ lubrication
- ♦ condition monitoring
- ♦ materials science education
